OLAQ Preservation

Pacific University Libraries has entered into an agreement with Portico for e-journal preservation services for the journals that the Libraries publish to ensure both the long-term integrity and accessibility of the born digital content. Information on Portico’s preservation strategy is available here: http://www.portico.org/digital-preservation/services/preservation-approach.

Currently, the MOU between OLA and Pacific for the publication of OLAQ does not include this level of preservation services, but the Pacific University Libraries are prepared to include OLAQ in our arrangement with Portico, assuming that this does not conflict with current OLA preservation strategies. A written addendum to the current MOU would be executed, upon approval of the OLA Board, in order to document this additional service.
